

Green skills education

What courses cost, how quality shows up in reviews and credentials, which skills are rising, and why a 4.7-star course still may not produce an installer.

This PDF is the full synthesis. You do not need GitHub, Python, or a spreadsheet. Snapshot dated 16 September 2026. Costs are typical unsubsidised list prices in US dollars unless a subsidy is named. FX: GBP 1.30, SGD 0.78, EUR 1.10, AUD 0.67.

1. Hiring is ahead of training Green hiring grew 7.7% vs 4.3% for green skills (LinkedIn 2025). About 20% of OECD workers are in green-driven jobs; only 2–14% of adult courses have green content.
2. Stars are not jobs England Heat Training Grant: 94% liked the course, 33% installed a heat pump, 12% newly got MCS. The bottleneck is a first install and a business accreditation, not another video.
3. Pay for the credential that employers use Solar jobs: NABCEP-class bootcamp (~\$895) beats a \$20 overview. Carbon jobs: GHG Protocol \$30–\$600 or GHGMI \$435 beat Harvard \$7,160 on value. Singapore: SkillsFuture can cut NTU list prices by 50–90%.

Contents: headlines · cost vs quality · cost bands · future skills · labour-market spend · heat-pump conversion · Singapore SkillsFuture · open directory dump · method and limits · full scored list.

1. Headlines

Signal	Figure	Source
Green hiring vs green skills growth	7.7% vs 4.3% (still ~2x)	LinkedIn Green Skills 2025
Hiring premium for green talent	+46.6% vs overall workforce	LinkedIn 2025
Green hires in non-green job titles	53%	LinkedIn 2025
OECD workers in green-driven occupations	20%	OECD Employment Outlook 2024
Adult courses with green content	2.1–14.1% (AU, DE, SG, US)	OECD 2024
Employer skills changing by 2030	39%	WEF Future of Jobs 2025
Climate mitigation transforms the firm	47% of employers	WEF 2025
US solar PV installer median wage	\$53,140; jobs +37% 2025–35	BLS OOH
US wind turbine technician median wage	\$64,120; jobs +30% 2025–35	BLS OOH
US HVAC mechanic median wage	\$61,010; jobs +11% 2025–35	BLS OOH
UK employer spend per trainee	GBP 2,710 (series low)	DfE ESS 2024
Singapore SRA professionals	2,000 (2023) to 4,000 (2030)	Green Skills Committee 2025

Training supply is thin relative to job demand. Cheap MOOCs cover literacy. License and standard-setter courses are where employer-recognized quality concentrates.

Green hiring vs green skills

Figure 1. LinkedIn Economic Graph. Unit: percent year-over-year.

2. Cost per person vs quality

Quality index (0–100) = 35% star rating + 20% review-count confidence + 25% credential type + 20% employer recognition. A 5.0 with 8 reviews cannot beat a 4.7 with 1,000 reviews plus a license. Each number on the chart is one course; names and dollar amounts are in the key on the right. Diamonds have no public star ratings — quality is inferred from the credential.

Each number is one course (key at right). Filled circles = public star reviews (size = review count). Diamonds = no public stars. Quality = 35% stars + 20% review confidence + 25% credential + 20% employer signal.

Figure 2. Horizontal axis: unsubsidised cost per person, US dollars, log scale. Vertical axis: quality index. Colour: credential type.

Highest quality in this catalogue

Course	Provider	Cost USD	Stars	Reviews	Quality
NABCEP PV Installation Professional Certif	HeatSpring	\$1,795	4.72	1,080	92.2
Solar PV Boot Camp + NABCEP PV Associate E	HeatSpring / Sean White	\$895	4.72	1,046	91.5
SCEM WSQ Air Conditioning and Mechanical V	SEAS	\$819	4.50	224	85.5
SCEM WSQ Energy Measurement and Audit	SEAS	\$780	4.50	216	85.2
EPA 608 Technician Certification	HeatSpring / Brynn Cooks	\$125	4.50	128	84.7
Renewable Energy Specialization	Coursera / University of	\$199	4.80	1,367	84.3

Best value (quality divided by log cost)

Course	Cost USD	Quality	Value score
Heat Pumps 101	\$0	64.0	64.0
PVsyst solar design (Udemy Najdeah)	\$18	70.2	48.5
The complete SOLAR ENERGY course Beginner to advan	\$20	69.3	46.9
Solar Energy Basics	\$49	81.7	46.1
Solar Energy and Electrical System Design	\$49	80.8	45.6
Solar Energy Systems Overview	\$49	80.0	45.2

Figure 3. Top 12 value scores. Free literacy courses rank high because cost is zero.

3. Full cost ladder by skill cluster

Every course is here. Dollar labels are unsubsidised typical prices. Colour is credential type. UK and Singapore subsidies can cut the net price; those nets are discussed later, not on this chart.

Figure 4. Log scale so a \$20 course and a \$15,000 certificate can share one axis.

4. What the price bands buy

Band	Typical USD / person	What you get	Review / quality pattern
Free / audit	0	Literacy, weak or no credential	High stars, low employer weight
Marketplace sale	13–25	Tool tutorials (PVsyst, solar, EV intro)	Many reviews; wide quality spread
University MOOC certificate	49–80	Single Coursera / edX certificate	4.6–4.8 stars, 100–2,600 reviews
Specialization / Plus year	199–399	Multi-course university stack	Strong ratings; mid-tier credential
Official standard e-learning	30–600	GHG Protocol Scope 2 (\$30) to Scope 3 (\$600)	Few public stars; high employer signal
Industry license bootcamp	800–1,800	NABCEP PVA/PVIP, AEE CEM, UK L3 ASHP	4.7 stars + pass rates where published
NTU Singapore classroom (list)	1,700–15,500	PACE / NBS CET, IES and ACRA pathways	No course-level stars; SkillsFuture 50–90% off
University microcertificate	7,000+	Harvard Extension GHG	Highest brand, weakest value in this set

Implication. For a solar installer job, the jump that matters is MOOC to NABCEP (~\$895), not Udemy to another Udemy. For carbon accounting, GHG Protocol \$30–\$600 or GHGMI \$435 beat Harvard \$7,160 on value unless the Harvard name is the product. A public voucher of about GBP 2,710 or EUR 3,000 covers one license bootcamp or a professional diploma — not a Harvard microcertificate, and not a scatter of \$15 courses.

Figure 5. Skill clusters. Bubble size = number of courses in this catalogue.

5. Future courses worth stocking

Each panel below uses a different unit on purpose. Do not compare the 37% BLS job-growth bar with the 47% WEF employer bar as if they were the same thing.

Figure 6. BLS = US employment change. WEF = share of employers. LinkedIn = share of green hires.

Priority inventory (demand times training gap)

- Heat-pump / HVAC electrification — UK ~100,000 engineers needed; US ~110,000 HVAC vacancies, heading toward ~225,000.
- Energy management — LinkedIn 2025 fastest-growing green skill (AI and data-centre load).
- Environmental stewardship — first time in the WEF top-10 growing skills.
- Solar PV install and design — BLS +37%; solar-design skills spiking on profiles.
- Wind turbine service — BLS +30%, median \$64,120.
- GHG / CSRD / ESRS / ISSB reporting — regulation-pulled; cheap intros and \$15k professional stacks coexist.
- EV / charging — WEF top-15 growing role.
- Grid flexibility and storage; sustainable procurement; green skills inside non-green jobs (53% of green hires).

6. Public spend vs wages

Figure 7. All bars in US dollars so they can be compared. Original currency in brackets.

Figure 8. 20% of OECD workers are in green-driven occupations; 2–14% of catalogue courses are green.

Training cost against the job it points at

Each row is an occupation. Points on a row are courses aimed at that job, spread sideways so they do not sit on top of each other. Numbers match the key on the right. Bubble size is quality; colour is projected job growth.

Figure 9. Wages are US BLS occupation medians, not course placement rates.

7. Heat pumps: reviews are not jobs

This is the highest-value finding in the pack. England's Heat Training Grant (up to GBP 500, 9,100 vouchers) is the rare dataset that measures both course satisfaction and whether people then install.

Figure 10. DESNZ HTG 2025 survey, n about 139.

Figure 11. Per 100 graduates. Last bar is among those not already MCS-certified.

What actually converts a trainee into an installer

MCS is a business accreditation, not a personal exam. The Boiler Upgrade Scheme's GBP 7,500 grant only pays if the job is MCS-certified. The Heat Training Grant's GBP 500 pays for the course and stops there. HPA counted 7,800 UK course completions in 2023 and 7,000+ in 2024; about half still have no installation.

Path	GBP	USD at 1.30	What it does
L3 ASHP classroom (inc VAT)	702	913	The course HTG can discount
After Heat Training Grant	202	263	Net course in England
Own MCS year-1 fees (ex training)	1,090	1,417	Certification body + code + MCS
Course + own MCS year 1	~1,792	~2,330	What conversion actually costs
HPIN umbrella first job	500	650	They hold MCS; you install
Nesta Start at Home first install	0 kit	0	Funded kit in the engineer's own house

- Supervised first install — Nesta Start at Home: 2,000 registered, 250 live, 83 completed. Daikin adds GBP 750 off the first customer job.
- MCS umbrella for early jobs — HPIN (EDF): join GBP 0; GBP 250 design + GBP 250 audit per job. Same pattern at Alto, Baxi, manufacturer networks.
- Own MCS only if volume is coming — fee breakeven vs umbrella is about 3 certified jobs. After that own MCS is cheaper on cash. The real cost is QMS time, insurance, a first house, 2–4 months.

Own MCS £1,090 (Dwellow/MCS) excludes training time and insurance. Umbrella is charged every job. HTG £500 does not pay MCS fees. USD ≈ GBP × 1.30.

Figure 12. Vertical axis: British pounds. Horizontal axis: certified jobs in year 1.

8. Singapore SkillsFuture — subsidies and courses

We did not score every SkillsFuture course. SSG has counted 640+ sustainability CET programmes and 13,000+ enrolments. The 91-row catalogue is the scored sample: SFGW-SR (ISCA, NTU SCTP and FlexiMasters, TP, NTUC ISSB and AI stacks) plus SEAS SCEM and solar WSQ, NUS, SMU, SIT, SP, and Ngee Ann solar diploma. The next section dumps 975 green-titled TGS codes from the open directory for lookup. Click any scored course name in the appendix to open its page. Confirm live fees on MySkillsFuture before you pay.

How the money actually stacks (typical SSG CET)

Who	Scheme	What it usually does
SC 21–39 and PR 21+	Baseline SSG funding	50% or 70% of the fee (course tier). GST often on the full fee.
SC aged 40+	Mid-Career Enhanced Subsidy (MCES)	70% or 90% of the fee. You pay only the nett.
SME-sponsored SC/PR	ETSS	70% or 90%. Employer claims.
SCTP + unemployed / ComCare / WIS / PwD	Additional Funding Support	Up to 95% of SCTP fees.
SC aged 25+	SkillsFuture Credit (base)	About S\$500 to offset the nett AFTER SSG.
SC aged 40+	SkillsFuture Credit (Mid-Career)	Extra S\$4,000 on selected long-form / SCTP / IHL stackables.
SC aged 40+ on long programmes	Mid-Career Training Allowance	Income support (not a fee discount). Part-time S\$300/mo.
Foreigner	No SSG fee funding	Pay list. Credit is for citizens.

Hub pages: SkillsFuture Green Workplace · Singapore Green Plan courses · MySkillsFuture course search. Attendance is usually 75% plus a pass, or the subsidy can be clawed back.

NTU list vs funded Singaporean (USD at SGD 0.78)

NTU offering	List (inc GST)	SC 21–39 / PR	SC 40+ (MCES)
CM2 Carbon Accounting Fundamentals	S\$3,270 (~\$2,551)	S\$1,770 (~\$1,381)	S\$1,170 (~\$913)
SCTP GHG module	S\$3,815 (~\$2,976)	S\$1,145 (~\$893)	S\$445 (~\$347)
SCTP Sustainability Reporting + AI (135h)	S\$19,838 (~\$15,474)	S\$5,951 (~\$4,642)	S\$2,311 (~\$1,803)
Sustainable Finance certificate	S\$5,341 (~\$4,166)	S\$2,891 (~\$2,255)	S\$1,911 (~\$1,491)
Carbon Markets exec (per module)	S\$3,270 (~\$2,551)	S\$1,770	S\$1,170
Renewable Energy Systems in Smart Grids	~S\$5,616 (~\$4,380)	~S\$1,685 (70%)	SME ~S\$654
CEng (SG) Sustainability 4 cores	S\$11,990 (~\$9,352)	—	electives still TBC

Singapore demand signal	Figure	Source
Sustainability reporting professionals	2,000 (2023) → 4,000 (2030)	Green Skills Committee 2025
Solar / storage / smart grid / power-import workforce	+70% to ~720 by 2026	Green Skills Committee 2025
Green-jobs demand growth 2024	+27% (fastest in Asia)	LinkedIn
Carbon Markets Academy at NTU	300 professionals by 2027	EDB / NTU
Green workforce budget	S\$235 million	SBR 2026

GHGMI 201 is \$435 with an exam. NTU CM2 is \$2,551 list / about \$913 after 70% funding. You are paying for classroom time, the IES Chartered Engineer (SG) pathway, and Singapore statute — not the same product as a \$435 e-learn. After MCES, NTU carbon accounting sits near GHG Protocol Scope 3 (\$600) and well below Harvard (\$7,160). The SCTP reporting certificate at \$15k list is the ISSB / ACRA compliance stack, not a solar-installer bootcamp.

9. SkillsFuture open directory dump

The scored catalogue stays 91 courses on purpose. Plotting hundreds of TGS rows on the quality scatter would bury the courses that have credentials and reviews. This page is a lookup inventory from the public MySkillsFuture directory (data.gov.sg dataset d_b5802b76f409764c16dde4bf2feb19cd).

Signal	Figure
Directory rows filtered	25,813 → unique green-titled TGS
Green-titled unique TGS	975
Already in the scored catalogue	19
New inventory rows	956
Median list fee	S\$1,698
Median fee after SSG	S\$600
Rows with star ratings	335 (median 4.0)

Cluster (title regex — coarse)	Courses	Median list SGD	Median after SSG SGD
ESG / reporting	741	S\$1,750	S\$600
Carbon accounting	108	S\$1,600	S\$512
Energy management	38	S\$1,050	S\$525
Solar PV	33	S\$900	S\$400
Energy systems / grid	28	S\$1,900	S\$753
EV / mobility	22	S\$1,005	S\$302
Heat pump / HVAC	5	S\$2,118	S\$635

ESG / reporting is the default bucket when a title does not match solar, carbon, energy, EV, or heat-pump patterns. That is why 741 of 975 sit there — not because Singapore has 741 ISSB courses. Heat-pump / HVAC titles in this dump: 5.

Providers and fees in the dump

Figure 13. Left: course counts by training provider. Right: median list fee vs median fee after SSG, Singapore dollars. After-SSG is the directory's published subsidy column, not SkillsFuture Credit on top.

Most-reviewed dump rows not already in the scored list (click the name)

Course (click for lookup)	Provider	List SGD	Stars	Reviews
Sustainability at Our Core - Equipping You to Dr	Nanyang Polytechnic	SGD 235	4.5	928
PWM-Waste Management: Workplace Safety and Healt	WORK WORK PRIVATE LIMITED	SGD 360	5.0	910
Sustainability 101 for the Green Economy	Nanyang Polytechnic	SGD 300	4.5	722
Sustainability - The Next Challenge	NATIONAL UNIVERSITY OF SINGA	SGD 1,900	4.5	571
National EV Specialist Safety (NESS)	NTUC LEARNINGHUB PTE. LTD.	SGD 2,000	4.0	493
CyberSense: Empowering a Sustainable and Secure	ACCTRAIN ACADEMY PTE. LTD.	SGD 550	4.5	471
Essentials of Good Governance in a Sustainable W	LEARNCOLLAB PTE. LTD.	SGD 290	4.5	437
CSE Certified Sustainability (ESG) Practitioner	NTUC LEARNINGHUB PTE. LTD.	SGD 3,000	4.0	432

Full dump with every TGS lookup: `data/myskillsfuture_green_dump.csv`. Pattern: `https://skillsfuture.gobusiness.gov.sg/course-directory/courses/{TGS}`. Refresh with python scripts/`ingest_myskillsfuture.py`. Do not merge these rows into the scored catalogue unless you code credential and employer signal by hand.

10. How quality was scored, and the limits

$\text{quality_index} = 0.35 \times (\text{stars} / 5 \times 100) + 0.20 \times (\log_{10}(\text{reviews}+1) / 4 \times 100) + 0.25 \times \text{credential} + 0.20 \times \text{employer signal}$. Missing stars are scored as a neutral 70, and review confidence is then zero, so unreviewed professional courses are not fake-4.8'd and not crushed to zero.

What reviews can and cannot do

- They measure learner satisfaction (clarity, production, instructor).
- They do not measure job placement. HeatSpring's 88% NABCEP pass rate and the HTG 33% install rate are better outcome metrics.
- A marketplace 4.4 with 11,000 reviews is a popularity signal, not an employer signal.

Limits of this snapshot

- Udemy list prices are fictional for most buyers; sale price is used as typical.
- Coursera specializations assume about 4 months at \$49/month unless the row is Coursera Plus (\$399/year).
- GHG Protocol, GHGMI, AEE, SEI, NATE programmes, and NTU courses often publish no course-level stars.
- One EV row is low-confidence (estimated reviews).
- Wages are US occupation medians, not graduate placement. HVAC wage is the heat-pump proxy (no separate BLS heat-pump installer code).
- LinkedIn green skills are self-reported profile skills.
- HTG survey n is about 139 — directional, not a census.
- The SkillsFuture dump is title-filtered inventory. Unmatched titles default to ESG/reporting. After-SSG fees in the dump do not include SkillsFuture Credit.
- This is not legal, careers, or investment advice. Confirm live prices and funding rules before buying a course.

11. Full scored list (click the name to open the source)

Sorted by cluster then cost. Quality is the 0–100 index. SG nett SC 40+ is the SkillsFuture MCES-style payable in Singapore dollars where we have it; otherwise a dash. Blue course names are links. US/UK rows have no Singapore nett.
